For other terms and definitions refer to the SOP-QA-003 «Pharmacovigilance Glossary».

V. PROCEDURE

A. General Specification

1. Security Principles

The Security Principles define Information Security as the application of control measures to protect the confidentiality, integrity and availability of systems and services:

- Confidentiality – information is only accessed by those who have been authorized to do so for legitimate purposes.
- Integrity – accuracy and completeness of information and information processes is maintained so that it can be trusted.
- Availability – authorized users have access to information when and where it is needed.

2. Information Subject

a) Information subject to this SOP includes, but is not limited to:

- electronic information stored on computers, disks, any other electronic storage media;
- information transmitted by electronic means, including incoming and outgoing emails, message transmissions through mobile phone applications or messengers, video conferencing, telephone traffic;
- hard copy information including paper records, whiteboards, briefing boards and notice boards;
- Spoken information.

b) An information system includes elements of the following:

- Physical environment (e.g. buildings, equipment, cables, etc.).
- Information and data.
- Software and hardware.
- Operational Service provision (what the system is there to achieve).
- Human resources (users).

B. Process

1. Computer User Accounts

a) Processes for allocating, amending and removing user access rights are set out by the SA on order of Director.

b) In order to log on as a SA, personnel must be an authorized administrator and be in possession of system logon credentials allocated to them.

c) SA appointed by Director.

d) SA can be IT specialist or any other Pharmex's personnel with appropriate knowledge.
